IV vitamins, aminos and ozone/UBI are additive to usual therapy that your doctor advises. We suggest best results come with a series of IV solutions (packages) along with a diet very rich in organic, non-GMO, plant-based foods, avoiding processed foods. Drink filtered water VOID of fluoride and chlorine along with regular stretching and cardio activity. FDA has not evaluated any of these therapies and no claims to cure any specific disease are being suggested.

*NOTE: Higher dose vitamin C (> 25g ascorbic acid), Ozone UBI, and Chelation require a medical treatment plan and reassessment(s).
