This reduces lactic acid buildup and allows for cellular energy production. |
| 15 min | <div>Glutathione IV Push</div> <div>\$110</div> | <div><div><div>💧 Glutathione</div></div></div> | L-Glutathione brings quintessential antioxidant defense. Glutathione is a very simple molecule made from three amino acids – cysteine, glycine and glutamine. Natural levels of glutathione diminish with age and in chronic illness, so boosting it can help with illness recovery, detoxing, and energy. |
| 30+ min | <div>Vitamin C*</div> <div>starting at \$140</div> | <div><div><div>2-5 grams \$140</div><div>6-10 grams \$180</div><div>11-19 grams\$200</div><div>20+ grams.....\$220</div></div></div> | Single session for acute illness or in a series for chronic illness. Vitamin C (Ascorbic Acid) is the ultimate immune system enhancer. High dose Vitamin C helps protect the body's cells from damage, maintaining healthy skin, teeth, bone, cartilage, and blood vessels, AND improves brain function. +May be up to 90 minutes. |
| 2-8 hours | <div>NAD+</div> <div>starting at \$1500</div> | <div><div><div>NAD 250 mg (set of 5 treatments)\$1500</div><div>NAD 500 mg (set of 5 treatments) \$2000</div><div>NAD 1000 mg (set of 5 treatments) \$3000</div></div></div> | Initial treatments are recommended to be scheduled every 1-2 days. NAD+ (Nicotinamide Adenine Dinucleotide) occurs naturally in the body, and plays a major role in maximizing energy at the mitochondrial level, where micronutrients are converted to energy-rich ATP molecules to enable cellular function. NAD promotes fat metabolism and may help manage a wide spectrum of diseases, ranging from diabetes to cancer. It is neuro-regenerative & anti-aging. |
| 60 min | <div>Ozone UBI*</div> <div>starting at \$299</div> | <div><div><div>Single\$299</div><div>Mini Set (5 treatments)\$1400 – save \$95</div><div>Small Set (10 treatments).....\$2400 – save \$590</div><div>Large Set (20 treatments)\$4600 – save \$1380</div></div></div> | It is recommended to start with a minimum of five treatments. Ozone (O3) is added into your own 60 mL of blood and reinfused with the aid of ultraviolet light to promote optimal oxygenation, reduce inflammation, and modulate the immune response. |
| 90 min | <div>High Dose Ozone UBI*</div> <div>starting at \$750</div> | <div><div><div>Single\$750</div><div>Mini Set (3 treatments)\$2000 – save \$250</div><div>Small Set (6 treatments).....\$3800 – save \$700</div><div>Large Set (10 treat).....\$6000 – save \$1500</div></div></div> | Initially, once a week treatments are recommended. Ozone (O3) blended with 300 mL of blood, reinfused through UV lights is equivalent to approximately three (3) standard treatments. |
| 2 hours | <div>EB00*</div> <div>\$1500</div> | <div><div><div>Single\$1500</div><div>Package of 3 \$4050 – save 10%</div><div>Package of 5\$6375 – save 15%</div><div>Package of 8\$9600 – save 20%</div></div></div> | See description for dosing recommendations. Extracorporeal blood oxygenation and ozonation (EB00) provides the most robust therapy supporting immune system optimization. Chronically sick patients will need a minimum of 3 treatments, delivered once per week, whereas a less chronic, but "walking sick person," is recommended 2 treatments. For a patient looking for maximum health optimization or maintenance, we'd suggest 1 therapy quarterly or as desired. |
| 90 min | <div>Chelation (EDTA)*</div> <div>starting at \$170</div> | <div><div><div>Single \$170</div><div>Mini Set (15)\$2300 – save \$250</div><div>Full Set (30)\$4100 – save \$900</div></div></div> | Initial treatments recommended 2-3 times per week. EDTA has been shown to remove lead, heavy metals, and aid in vascular flow, helping to reverse plaque formation by targeting calcium buildup. Studies show plaque reduction with 30 treatments done 1-2 times weekly. Afterwards, monthly maintenance chelation is recommended. Our IV chelation contains additional vitamins and minerals. |
| 120 min | <div>Plaquex*</div> <div>starting at \$170</div> | <div><div><div>Single \$170</div><div>Mini Set (10)\$1500 – save \$200</div><div>Full Set (30)\$4100 – save \$1000</div><div>Set of 30 with Chelation\$8100 – save \$2100</div></div></div> | Treatments every 3-7 days are recommended for recovery, then every 1-3 months for maintenance. Plaquex is a mixture of essential phospholipids (lecithins or Phosphatidyl Cholines) designed to reverse cholesterol plaque buildup in the arteries (atherosclerosis), and particularly powerful when combined with IV chelation, which targets the calcium component of plaque buildup. Plaquex IV has been shown to have many beneficial effects on the body, including improved circulation, increased blood flow, and reduced inflammation. |

*NOTE: Higher dose vitamin C (> 25g ascorbic acid), Ozone UBI, EB00, Chelation and Plaquex require a medical treatment plan and reassessment(s).
