Energy

\$180

- ◆ Vitamin Blend
- ◆ Minerals
- ◆ Glutathione

A blend of nutrients to promote cellular energy production (in the mitochondria). ATP produced are the packets of energy for all metabolism, growth, immune function, and healing.

Hyper Energy

\$439

- ◆ All that is in 'Energy'
- ◆ + Ozone UBI

Combines both the actions of nutrition for promoting cellular energy production with Ozone UBI, resulting in simultaneous energy production and inflammation combat.

Methylene Blue

\$180

- ◆ Methylene Blue

Discovered to support mitochondrial energy production. *May interact with certain drugs*

Recovery & Performance

\$180

- ◆ Vitamin Blend
- ◆ Minerals
- ◆ L-citrulline
- ◆ L-arginine
- ◆ Ascorbic Acid
- ◆ L-carnitine

Promotes recovery from chronic muscle fatigue or a more intense workout with focused cellular recovery using a blend of vitamins and minerals with amino acids and a boost of vitamin C with L-carnitine. This reduces lactic acid buildup and allows for cellular energy production.

Glutathione IV Push

\$120

- ◆ Glutathione

L-Glutathione brings quintessential antioxidant defense. Glutathione is a very simple molecule made from three amino acids – cysteine, glycine and glutamine. Natural levels of glutathione diminish with age and in chronic illness, so boosting it can help with illness recovery, detoxing, and energy.

Vitamin C*

starting at \$180

- 6-10 grams \$180
- 20+ grams \$220

Vitamin C (Ascorbic Acid) is the ultimate immune system enhancer. High dose Vitamin C helps protect the body's cells from damage, maintaining healthy skin, teeth, bone, cartilage, and blood vessels, AND improves brain function.

NAD+

starting at \$1500

Initial treatments are recommended to be scheduled every 1-2 days.

- NAD 250 mg (set of 5 treatments) \$1500
- NAD 500 mg (set of 5 treatments) \$2000
- NAD 1000 mg (set of 5 treatments) \$3000

NAD+ (Nicotinamide Adenine Dinucleotide) occurs naturally in the body, and plays a major role in maximizing energy at the mitochondrial level, where micronutrients are converted to energy-rich ATP molecules to enable cellular function. NAD promotes fat metabolism and may help manage a wide spectrum of diseases, ranging from diabetes to cancer. It is neuro-regenerative & anti-aging.

Ozone UBI*

starting at \$299

It is recommended to start with a minimum of five treatments.

- Single \$299
- Mini Set (5 treatments) \$1400 - save \$95
- Small Set (10 treatments) \$2400 - save \$590
- Large Set (20 treatments) \$4600 - save \$1380

Ozone (O3) is added into your own 60 mL of blood and reinfused with the aid of ultraviolet light to promote optimal oxygenation, reduce inflammation, and modulate the immune response.

High Dose Ozone UBI*

starting at \$750

Initially, once a week treatments are recommended.

- Single \$750
- Small Set (6 treatments) \$3800 - save \$700
- Large Set (10 treat) \$6000 - save \$1500

Ozone (O3) blended with 300 mL of blood, reinfused through UV lights is equivalent to approximately three (3) standard treatments.

EBOO*

\$1500

See description for dosing recommendations.

- Single \$1500
- Package of 3 \$4050 - save \$450
- Package of 5 \$6375 - save \$1125
- Package of 8 \$9600 - save \$2400

Extracorporeal blood oxygenation and ozonation (EBOO) provides the most robust therapy supporting immune system optimization. Chronically sick patients will need a minimum of 3 treatments, delivered once per week, whereas a less chronic, but "walking sick person," is recommended 2 treatments. For a patient looking for maximum health optimization or maintenance, we'd suggest 1 therapy quarterly or as desired.

Chelation (EDTA)*

starting at \$180

Initial treatments recommended 1-2 times per week, then most patients do maintenance infusions.

- Single \$180
- Mini Set (15) \$2300 - save \$250
- Full Set (30) \$4100 - save \$1000
- Set of 30 with Chelation \$8100 - save \$2100

EDTA has been shown to remove lead, heavy metals, and aid in vascular flow, helping to reverse plaque formation by targeting calcium buildup. Studies show plaque reduction with 30 treatments done 1-2 times weekly. Afterwards, monthly maintenance chelation is recommended. Our IV chelation contains additional vitamins and minerals.

Plaquex*

starting at \$180

Treatments every 3-7 days are recommended for recovery, then every 1-3 months for maintenance.

- Single \$180
- Mini Set (10) \$1500 - save \$200
- Full Set (30) \$4100 - save \$1000
- Set of 30 with Chelation \$8100 - save \$2100

Plaquex is a mixture of essential phospholipids (lecithins or Phosphatidyl Cholines) designed to reverse cholesterol plaque buildup in the arteries (atherosclerosis), and particularly powerful when combined with IV chelation, which targets the calcium component of plaque buildup. Plaquex IV has been shown to have many beneficial effects on the body, including improved circulation, increased blood flow, and reduced inflammation.
